

Week 1

DevOps Internship

Release Date: 20 July 2026

This week's topic is **Linux Fundamentals**. Since Linux is the backbone of DevOps and Cloud, it's important that everyone spends time understanding the basics before moving ahead.

➤ Topic

Linux Fundamentals

- Install Ubuntu (VirtualBox / VMware / WSL)
- Learn basic Linux commands
- Create users & groups
- Practice file and directory management

➤ Task

Prepare a short PDF explaining **at least 20 commonly used Linux commands** along with their purpose. Also, attach screenshots of your Ubuntu setup and the commands you've practiced.

Task Submission: Wednesday (EOD)

➤ Hands-on Activity

Create the following directory structure:

```
DevOps/  
├── Projects/  
├── Logs/  
└── Scripts/
```

After creating the folders:

- Create a few sample files.
- Set appropriate permissions.
- Compress the complete **DevOps** folder into a ZIP file.

Activity Submission: Friday (EOD)

Please make sure you complete both the task and the activity within the given deadlines.

***If you face any genuine issues, feel free to reach out before the submission date.**

Let's start this journey with consistency and make Week 1 a strong foundation for the weeks ahead.
